# JUICE CHARGER 2 - Key technical data

JUICE CHARGER 2 is an intelligent wall charging station with up to 22 kW charging power.

Identify, activate, control, pay. With an integral RFID reader and JUICE optional extras, JUICE CHARGER 2 has every option covered.

JUICE CHARGER 2 adds a touch of elegance and class to every wall. Reduced to the key visual essentials, this charger is elegantly simple. The high-quality chrome steel is robust and non-flammable, requiring no maintenance.

Dimensions	Height 820 mm, width 233 mm, depth 140 mm, cable length 3 m
Weight	approx. 8 kg (depending on the model)
Housing	1.5 mm brushed chrome steel housing
Protection class	IP65
Standards	IEC 62752, 62196, 61851, CE, EMV, RoHS
Voltage	230V/400V AC, 50Hz
Charging current	max. 32 A (1 or 3-phase)
Power output	max. 22 kW
Output/coupling	Type 2 (EN 62196), also as Type 1 (SAE J1772) on request
Operating temperature	-25°C to +45°C
Connection	5*6 mm <sup>2</sup> (max. 10 mm <sup>2</sup> )
Networking	Ethernet, RS485, 3G module
Activation	NFC (with credit card or mobile phone), RFID (with specially issued cards), web identification (look up by QR code or using the website address, e-mail activation), SumUp (payment terminal for debit and credit cards), etc.
Part of the Hubject payment system	OCPP 1.5, 1.6, 2.0
Management software	Accessible via browser: charging log, receipts issued, user management (e-mail addresses), whitelist management
Energy measurement	Integral meter, MID-certified
Key-operated lock	EMKA 2233X
Scope	Ready-assembled and pre-wired wall charging station, installation instructions

# JUICE CHARGER 2 - Configuration

## Basic model

<b>JUICE CHARGER 2</b>		<p><b>Robust</b> Extremely stable chrome steel housing, weather-resistant (splashproof and dustproof)</p> <p><b>Super-quick installation</b> Choice of standard fixings, integral levelling, sturdy quick connectors.</p> <p><b>Consistently successfully tested</b> We guarantee compatibility with all existing and new electric cars on the market with a Type 2 or Type 1 connector.</p>
------------------------	---	--

## Options

<b>Flex model</b>		<p><b>Always flexible</b> So you can take the integral JUICE BOOSTER 2 with you on your travels</p>
<b>Display</b>		<p><b>Extremely easy to use</b> Via an optional high-resolution touchscreen display</p>
<b>PayJUICE</b>		<p><b>Easy to pay</b> with the option to use all standard payment methods, and of course all regular credit card</p>
<b>accessJUICE</b>		<p><b>It couldn't be more convenient</b> A camera is installed directly on the housing so that the charging station can be activated by number plate recognition.</p>
<b>smartJUICE</b>		<p><b>Ready</b> The intelligence required for the smartJUICE load management system is already included in the basic version. You just need to connect it to a CPU and install the right software. See Sheet "smartJUICE - Technical Datasheet" for information on installing JUICE CHARGER 2 with load management.</p>

# JUICE CHARGER 2 - Installation instructions

1

## Preparation

- Open JUICE CHARGER 2 with the key provided.
- If using the Flex option: remove JUICE BOOSTER 2 so that you can access the cable glands.

## Housing concept

The housing is designed to let water and air through.  
The control unit is IP65, whereas JUICE BOOSTER 2 is IP67.

2

## Installation options

- Depending on your specific situation, the power cable can be surface-mounted (from above or below) or flush-mounted.
- Fit the edge protectors provided at the required position.

3

## Super easy to assemble

- Installation is a simple one-man job.
- Screw the upper mounting screw into the wall, attach the station, no need to align until the next step.

4

## Easy to align

- The station is incredibly easy to align.
- Fix in position using the bottom two assembly holes.

5

## Check under the cover

- Unscrew both screws on the power supply cover and remove the cover.
- Open the cable gland and remove the seal.

6

### Insert the power cable

- Place the cable gland cover over the power cable and insert the power cable.
- Put the seal (split) back in place to seal the control unit (IP65) and close the cable gland.

7

### Connect, get ready, go!

- Connect the power cable to the spring-type terminals in accordance with the labels.

8

### Put it all back together

- Position the power cable cover and screw back into position using the two screws.

9

### Plug in and play

- Plug the Ethernet cable into the Ethernet port directly on the control unit.

10

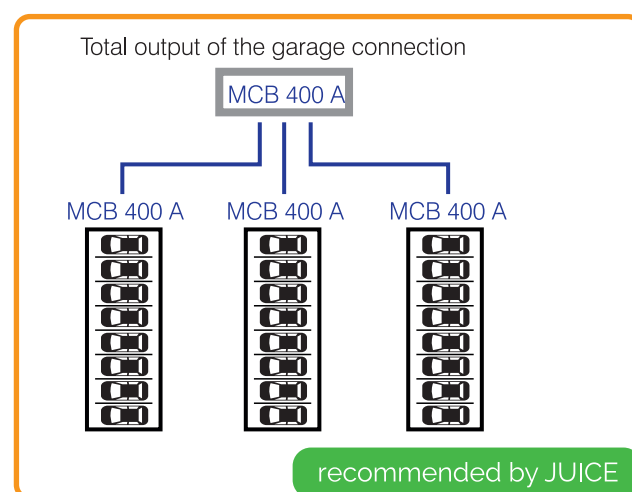

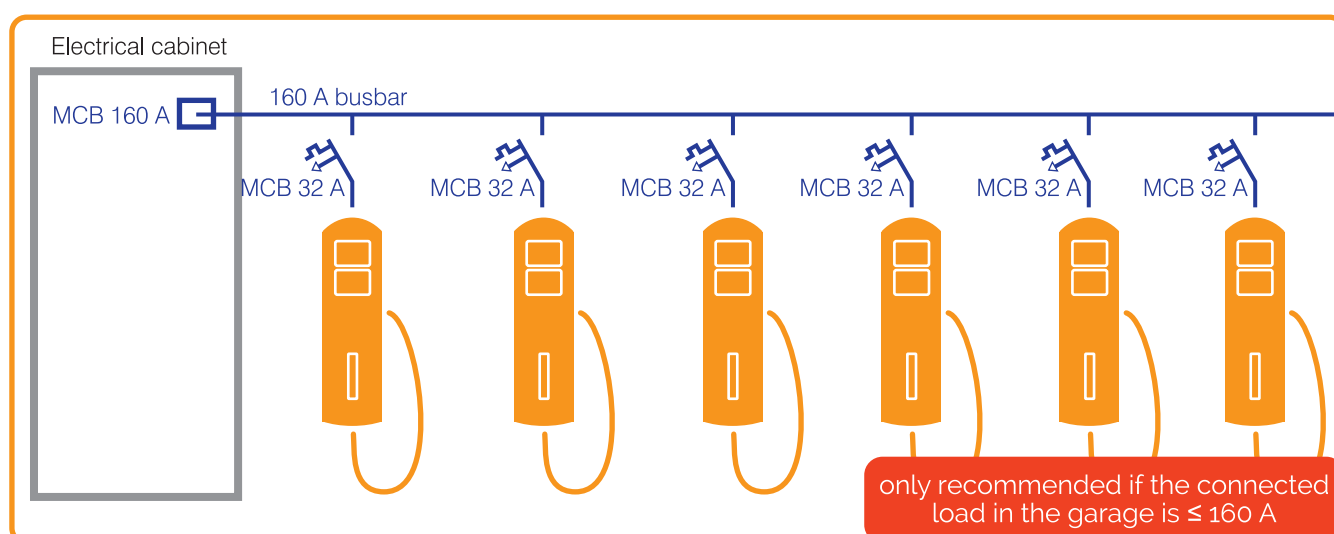

### Last lap

- Carry out standard tests.
- If using the Flex option: Insert JUICE BOOSTER 2.
- Lock JUICE CHARGER 2 with the key.
- Remove the protective film from the chrome steel housing.
- Clean the chrome steel housing with a clean cloth.
- Hand the key to the owner.
